Pumps, Motors, Parts and Repair Services

Performance When You Need it Most

Get OEM Level Performance with a Hydraulex Reman

Our Hydraulex Reman units offer you an affordable alternative to the costly and timely replacement of a new component. You get the performance and reliability of a new OEM unit at a fraction of the cost.

Every Hydraulex Reman unit is quality engineered to deliver OEM level performance. All units and parts are thoroughly inspected, machined and/or replaced when necessary, and then reassembled by one of our expert technicians. Each unit is then tested to OEM specifications. When you choose a Hydraulex Reman, you're getting a top quality, worry-free product that's backed by an industry leading warranty - the same as new.

For pricing and availability, please contact us at 1.800.323.8416 or sales@h-r-d.com

We also stock a large variety of remanufactured **Eaton** and **Sundstrand** pumps and motors for many mobile applications. For pricing and availability on Eaton and Sundstrand, please contact us at 1.800.238.0155.

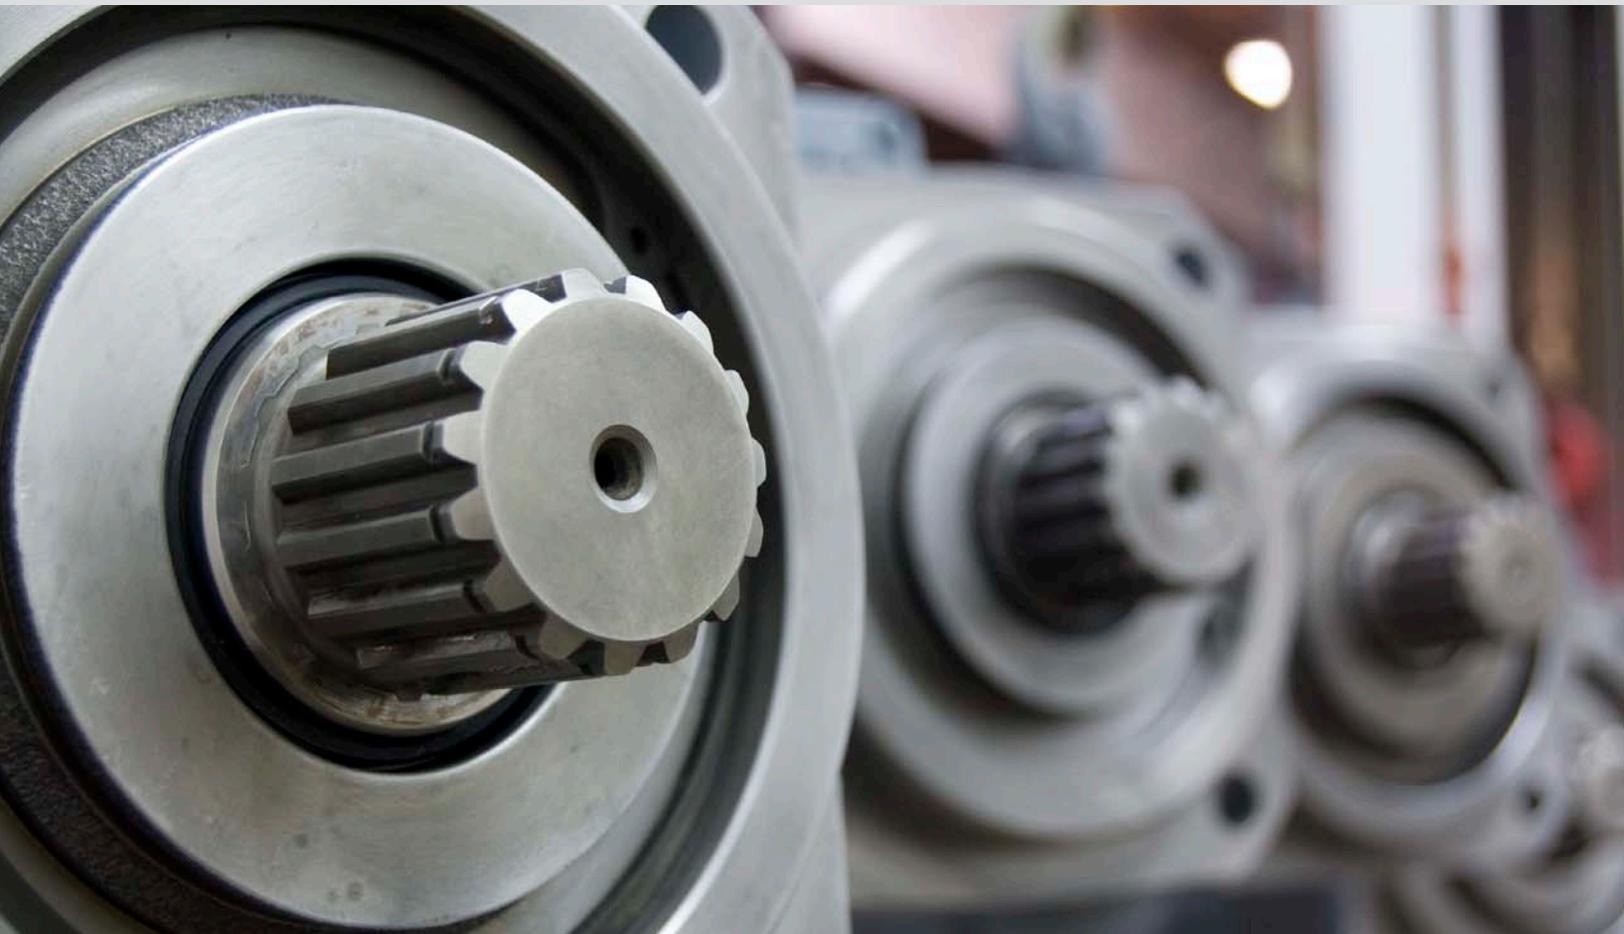

Just the Facts

Information is Key

In order to properly and correctly identify a particular hydraulic unit, we need as much information from you as possible. This helps ensure you are getting the correct unit for your machine.

Information needed to identify a unit will vary depending on the machine manufacturer and component model. To the right are examples of some key information needed to determine the correct unit for you and your application.

Get More from a Hydraulex Reman

Whether your equipment lifts, digs, hauls, drills or just moves, you can rely on Hydraulex Global's hydraulic products and services to deliver the performance and reliability you need to keep your equipment going. With our highly knowledgeable qualified technicians and strict processes, you can be confident in the quality of product you're getting: as good as new.

Our process of remanufacturing and repairing hydraulic components back to new OEM specifications cuts back on the need to produce new parts and units out of raw materials, and keeps a unit up and running for another lifecycle. We also reduce waste, reduce our impact on the environment and save you money in the process.

Significant Savings

Our Hydraulex Reman units offer you an affordable alternative to the costly and timely replacement of a new component. You get the performance and reliability of a new OEM unit at a fraction of the cost.

Quality & Reliability

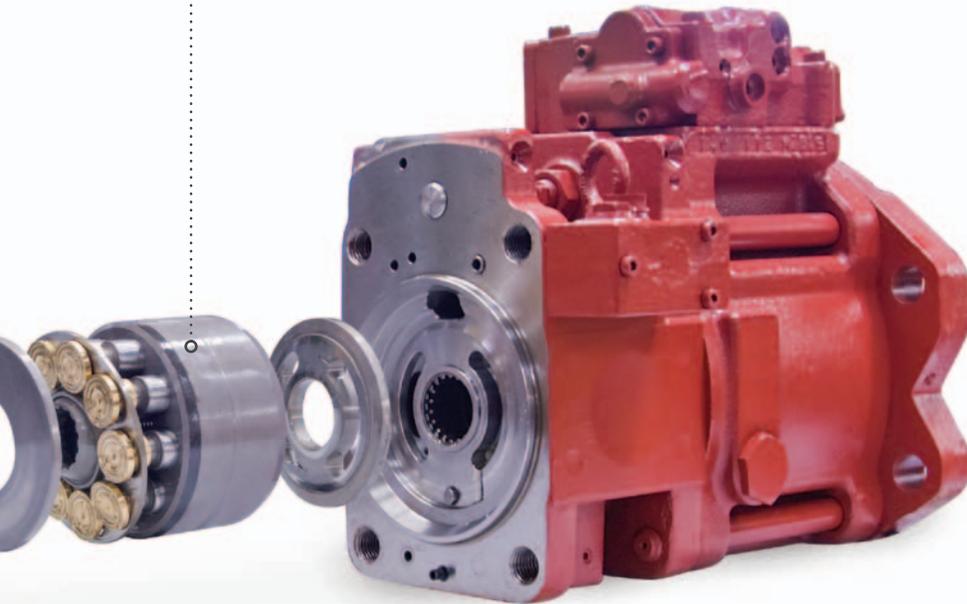

All reman units are put through several levels of quality control before the unit even makes it to the test stand. All internal parts are inspected during assembly and mated together for optimum efficiency. Furthermore, each unit is tested on contamination controlled test stands and set to OEM spec.

OEM Performance

Every Hydraulex Reman unit is quality engineered to deliver OEM level performance. All units and parts are thoroughly inspected, machined or replaced when necessary, and then reassembled.

We Also Stock Replacement Parts

We not only carry an extensive inventory of units, but also replacement spare parts for piston, vane and gear pumps and motors. Regularly stocked parts include OEM and aftermarket options for a variety of manufacturers.

Minimize Downtime

Due to our constantly growing inventory of ready to install Hydraulex Reman units, you get the added benefit of minimizing downtime significantly. We have a large variety of 'common' units on the shelf ready for immediate shipping.

Save Money with a Core Credit

Your existing unit has value. That's why we offer a core exchange option* when purchasing a reman unit. This allows you the opportunity to save even more money by sending your core back to us (we'll cover the freight) for a credit (core values vary with condition and model).

*Some units require a core exchange to complete the transaction.

Industry Leading Warranty

We are so confident in the quality and reliability of our products that we back them with an industry leading warranty: 18 months from the date of purchase, or 12 months from the date of install.

Reman Pumps by Machine Model

We stock a variety of remanufactured pumps for mobile equipment from component manufacturers such as: Kawasaki, Hitachi, Rexroth, Uchida, Linde, Komatsu, Sundstrand, Eaton and Vickers.

Specializing in Hydraulic Component Repairs

Setting the Industry Standard in Hydraulic Repairs

We've specialized in hydraulic component repair services for over 35 years, so you can trust that when it comes to hydraulic component repairs, there is no one better equipped to handle them than Hydralex Global. We have the experience and expertise necessary for repairing and rebuilding **piston, vane and gear type pumps and motors, valves, servo & proportional valves and cylinders**, for most any mobile or industrial application.

Every repaired unit goes through systematic testing procedures on contaminate controlled test benches, in accordance with OEM specifications before it leaves our facilities. This ensures your unit is running efficiently, contaminant free, set to OEM spec and ready to get back to work. Exceptional technical knowledge, state-of-the-art equipment and full in-house machining capabilities, give you a flexible one-stop shop for hydraulic repairs.

Contact us for a free quote for repair today.
